Education

Netaji Subhash Engineering College, Kolkata *2023-27*
B.Tech. in Information Technology, MAKAUT CGPA: 8.01/10

St. Mary's English High School, Jamshedpur *2020-22*
Higher Secondary Education, CBSE Score: 75.2%

Tagore Academy, Jamshedpur *2020*
ICSE, CISCE Score: 82.8%

Technical Skills

Languages: Java, Python, SQL.

Web Technologies: HTML, CSS, React.js, Bootstrap.

Backend & APIs: Node.js, Flask, REST APIs, Jinja2, SQLAlchemy.

Databases: PostgreSQL, SQLite, MongoDB.

Libraries: Pandas, NumPy, Matplotlib.

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, System Design, Operating Systems, Computer Networks.

Developer Tools: Git, SDLC, Agile, Scrum.

Achievements

- Solved 500+ problems of **Data Structures and Algorithms** across GeeksforGeeks, LeetCode, and HackerRank, demonstrating strong problem-solving and algorithmic proficiency.
- Solved 150+ SQL problems on HackerRank and CodeChef, demonstrating strong proficiency in **Structured Query Language** and relational database concepts, including PostgreSQL and Oracle Database.

Projects

Trekking Manager – Trekking Management System

– Developed a role-based trekking management web application using Python, Flask, SQLAlchemy, SQLite, Jinja2, and Bootstrap, implementing authentication, authorization, and Admin,Staff and Trekker workflows with account approval controls.

– Applied Flask Blueprints and Application Factory architecture with SQLAlchemy relationships and functional testing for authentication, authorization, booking edge cases, and API access control.

– **Tech Stack:** Python, Flask, Jinja2, SQLite, SQLAlchemy, Flask-Login, Bootstrap

Upchar – Hospital Management Platform

– Developed a full-stack Hospital Management Platform using Python, Flask, Vue 3, SQLAlchemy, SQLite, and JWT, implementing role-based authentication and workflows for Admin, Doctor, and Patient users.

– Designed normalized relational data models and concurrency-safe appointment workflows using database constraints to prevent duplicate bookings, with Redis caching for frequently accessed read endpoints.

– **Tech Stack:** Python, Flask, SQLAlchemy, SQLite, JWT, Redis, Celery, Docker

Churn & Revenue Impact Analysis

-- Engineered an end-to-end OTT churn analytics pipeline, integrating multi-table subscriber data and analyzing 20+ KPIs across contract types, subscription plans, and customer cohorts to identify high-risk churn segments.

-- Quantified MRR leakage and CLTV erosion among high-risk cohorts, uncovering contract-level churn disparities and translating insights into a data-driven contract migration strategy to improve retention and reduce recurring revenue loss.

-- **Tech Stack:** Python, SQL, SQLite, Pandas, NumPy, Matplotlib, Seaborn

Certifications & Courses

- **Data Science Certification Course** – Indian Institute of Technology, Madras (Jul 2023 – Jul 2024)
- **Advanced Programming Certification Course** – Indian Institute of Technology, Madras (Jul 2023 – Dec 2025)
- **SQL Intermediate Certificate** - HackerRank
- **Full Stack Web Development Course -** Value Added Training Program
